Fairfield 70 Series

STANDARD

- Full 45-degree fusion-welded mainframe and sashes deliver increased strength and energy efficiency.
- Multi-chambered extrusions improve thermal performance and structural integrity.
- Side load sash operates on two concealed, pre-calibrated sash balances.
- Sash perimeters are fully weatherstripped for improved thermal protection.
- Water management system with offset drainage to the exterior.

Fairfield 80 Series

UPGRADE

- Fusion-welded frame and sashes for increased strength and integrity.
- Multi-walled extrusions provide superb welding strength and structural integrity.
- 3-3/8" frame depth for multiple applications.
- Side-load sash operates on two concealed, precalibrated block and tackle balances.
- Full capture sill enhances protection from air and water infiltration.
- Full weatherstripping on the perimeter provides greater energy savings.
